[About](#)[Documentation](#)[Download](#)[License](#)[Support](#)[Purchase](#)

Welcome

SQLite is a software library that implements a [self-contained](#), [serverless](#), [zero-configuration](#), [transactional](#) SQL database engine. SQLite is the [most widely deployed](#) database engine in the world. The source code for SQLite is in the [public domain](#). [More...](#)

Sponsors

Ongoing development and maintenance of SQLite is sponsored in part by [SQLite Consortium](#) members, including:

The Bloomberg logo, consisting of the word "Bloomberg" in a bold, sans-serif font.

[Bloomberg](#) - A world leader in financial-information technology.

The Expensify logo, featuring a yellow shopping bag icon and the word "Expensify" in a bold, sans-serif font.

[Expensify](#) - We power the most exciting

Current Status

- [Version 3.9.2](#) of SQLite is recommended for all new development.

🏷 v3.7.0

🔗 3cefaf4

DB Browser for SQLite 3.7.0

 **MKleusberg** released this on 14 Jun · **74 commits** to master since this release

Whilst it is not so long since the release of 3.6.0 this new version contains some important enhancements, and fixes issues that are getting filed a lot. Specifically UTF-8 characters in the SQL Editor window and Windows dependency installation issues.

Please note that with any new translation you will need to manually select it in the preferences if you have used an earlier version, however fresh installs should detect the new translation.
